

## For Colleges and Universities

### Overview

The MICROS® 3700 point-of-sale system leverages CBORD's unique position as a systems integrator for campus card and point-of-sale operations to provide an unprecedented value proposition. MICROS 3700 offers robust point-of-sale and back-office operations, flexible reporting, and real-time business intelligence to help you increase efficiency, speed service, and provide a better experience for your customers.

Fully integrated with CBORD's Odyssey PCS™ and OdysseyOne™ systems, the MICROS 3700 processes all types of campus card transactions from a variety of media formats. With full standalone functionality, the system is capable of normal operation even if the network is unavailable.

### Enhanced interface and reporting

The MICROS 3700 features an enhanced user interface for improved order entry and response times. Graphic themes make it easy to customize touch screen displays, including buttons, backgrounds, information areas, prompts, and check detail.

Choose from over 150 standard report templates or generate custom reports using Seagate Crystal Reports®, Microsoft® Excel, or the report writer of your choice

## MICROS® 3700

### Flexible hardware options

Whether you choose the Workstation 4 or PC Workstation 2010, MICROS 3700 leverages the Client Application Loader (CAL), a revolutionary software deployment agent, to deploy system software updates in just minutes. With such reliable hardware and software, you can spend less time maintaining your system and more time managing your business.

### Security and accountability

MICROS 3700 provides a comprehensive data security solution, including:

- Customized operating system security (Microsoft® Windows® XP or 2003 server)
- Strong data encryption of stored data and data transmitted over your network
- A comprehensive security log maintaining an audit trail of all activities involving sensitive data

MICROS 3700 security and data encryption follow Credit Card Industry Payment Application Best Practices, a major component for PCI compliance.
