For Colleges and Universities

Overview

You asked and CBORD® delivered! The dual magnetic stripe/proximity reader is a versatile and dependable card reader with functionality for both magnetic stripe and HID proximity card-reading. No longer do you need to mount two card readers at one door!

The dual reader is weatherproof, and features an appealingly small profile (4.6" L x 2.4" W x 1.4" H). This reader is ideal for locations where space is at a premium, and is more cost-effective than installing and maintaining multiple readers.

CS Access™ integration

The dual reader is fully integrated with CS Access™, CBORD's access control solution for CS Gold®, Odyssey PCS™, and Odyssey HMS™. Access logs are stored in CS Gold's database, allowing for simplified report generating. CS Gold patron groups are supported, and integration to CBORD's housing management software allows access to be granted to particular facilities as soon as a student receives his or her room assignment..

Features

- **Weatherproof**
- **Online operation**
- **Two programmable LEDs**
- **Small profile**
- **No need for two readers at one door**
