

## Epic Card Reader

# OdysseyPCS™

### **Comprehensive Solutions**

CBORD provides campus card systems, integrated security solutions, housing management, food and nutrition management, catering solutions, and off-campus programs to more than 6,000 organizations. Our focus is on comprehensive solutions that increase revenue, reduce costs, enhance campus safety, improve student satisfaction, and integrate systems seamlessly.

### **Innovative Products**

Our innovation is customer driven. Working in partnership with users, we listen to the industry's evolving needs and develop solutions to keep you a step ahead.

### **Dedicated Service**

The quality of our products is made greater by the caliber of our employees. Through open dialogue with you, our customers, CBORD strives to not only meet, but exceed your expectations; we are committed to providing superior service in all aspects of our customer relationships. You can reach us twenty-four hours a day, seven days a week, and know you have a team dedicated to your satisfaction and success.

## For Colleges and Universities

### **Overview**

The Epic card reader from CBORD® is a dependable and affordable card-reading terminal designed to handle debit and privilege verification transactions with Odyssey PCS™. Whether you run a debit operation, traditional dining facility, retail store, or an activity location, Epic card readers can work for you.

### **Activities and Privileges**

You can use the Epic as an activity terminal that will verify a person's eligibility for a particular activity or event. Each of these activities is defined in the system and identified by a number. Activities can be set up to occur once, a limited number of times, or at will. Limits can be placed on each activity.

With the Epic's PLUS integrated receipt printer and optional integrated cash drawer, the need for a cash register is often eliminated. Additionally, the Epic's small footprint and lightweight structure make it ideal for locations where space is at a premium.

## Highlights

- **Encrypted transactions**
- **Transactions logged when offline**
- **Transactions automatically upload once online**
- **Integrated NIC (Network Interface Card)**
- **Integrated thermal receipt printer**

# Epic Card Reader
