

## CS Gold® AdminWeb

Nightly reports can be viewed from any PC with Internet access—CS Gold AdminWeb gives you the freedom to obtain nightly reports from anywhere, anytime!

### Ad Hoc Reports

With ad hoc reports, all non-administrative features of the CS Gold reports GUI are available online. All privileges assigned in CS Gold are automatically carried over to AdminWeb, so no additional privilege configuration is needed. Users without CS Gold installed on their workstations will have access to activity reports, alarm reports, SV&C reports, meal plan reports, and much more.

## For Colleges and Universities

### Overview

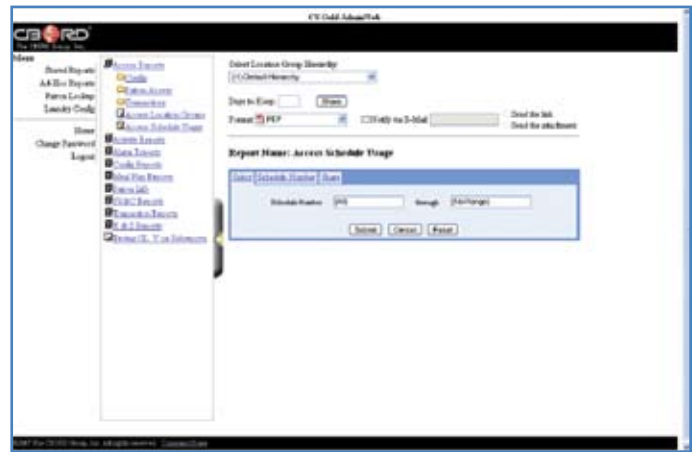

CS Gold® AdminWeb is a web-based module of CS Gold created to improve accessibility for users without CS Gold installed on their workstations. Designed to significantly reduce GUI requirements, AdminWeb includes a number of features that bring the power of CS Gold to any computer with Internet access. These features include the following:

- Nightly reports
- Ad hoc reports
- Patron lookup
- Access assignments
- Emergency notification

### Nightly Reports

AdminWeb allows nightly reports to be printed or downloaded from the Internet. Authentication is accomplished either through Oracle® or through campus authentication mechanisms, with privileges controlled by the individual or the user group. Configuration options are as follows:

- Organize by date/report
- Modify views
- Filter reports previously downloaded
- View all reports not previously viewed

Ad hoc reports

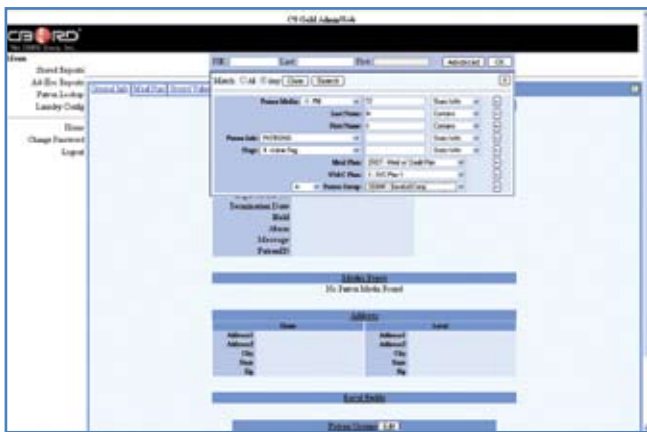

## The power of a GUI at your fingertips

- **Nightly reports**
- **Ad hoc reports**
- **Patron lookup**
- **Access assignments**
- **Emergency notification**

# CS Gold® AdminWeb

## Patron Lookup

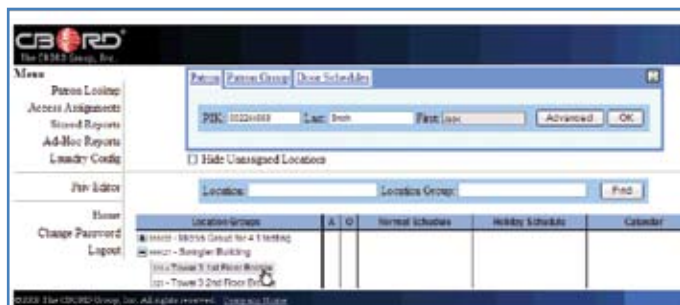

The patron lookup feature of CS Gold AdminWeb makes all non-administrative features of the CS Gold patron GUI available via the web. Search by name, meal plan, SV&C plan, and even patron group. This online feature makes it easy to retrieve information from any computer with Internet access. An Admin configuration tool is available for administrators to configure privileges for this feature.

Patron lookup

## Access Assignments

Users may view and manage access assignments online with CS Gold AdminWeb. This feature makes it easy to add, edit, and delete access assignments, schedules, and calendars. Users may also assign access to patrons and patron groups and set up door lock/unlock schedules, all from the convenience of the Internet. An Admin configuration tool is available for administrators to configure privileges for this feature.

Access assignments

## Emergency Notification

Emergency notification capabilities have also been added to CS Gold AdminWeb and other CBORD® web tools such as ManageMyID™ and WebCard Center™. This site-wide messaging capability makes it possible to display emergency messages in the header area of these websites in case of inclement weather, security incidents, etc.

## Online Convenience

Since CS Gold AdminWeb resides on a web server, end users are always using the latest software. Additionally, the only end-user requirements are privileges to log in and access the Internet. Combine this with horsepower that resides on a web server—not a user's computer—and you have an easy-to-use, highly accessible tool to expand the power of CS Gold.

CBORD and CS Gold are registered trademarks, and ManageMyID and WebCard Center are trademarks, of The CBORD Group, Inc. All other brand and product names are believed to be trademarks, registered trademarks, or service marks of their respective owners.
